

# VirtualMerchant Mobile

Built on Experience You Can Trust

## Accept Payments Anywhere, Anytime.

VirtualMerchant Mobile gives you the ability to accept payments anywhere you go using your smartphone or tablet. The App works with most Apple® and Android® mobile devices. With an easy set up and configuration process, you can accept key-entered transactions or attach an encrypting card reader for swiped transactions. Customers simply sign the screen and a receipt can be emailed to your customer or printed at the time of sale.

Ideal for any size business needing to process transactions on the go, you can also use VirtualMerchant Mobile on location to accept payments during peak sales seasons. An extension of VirtualMerchant, all payment data and receipt information is stored in a secure data center, away from your business. Additionally, you have 24/7 online access to valuable reports to help you run your business.

## Benefits at a Glance

- Accommodates an unlimited number of mobile devices to support businesses of any size
- Accepts/processes tips in a service-based environment and auto-calculates sales tax on transactions
- Supports activation and redemption of Elavon's closed-loop Electronic Gift Card Program
- Supports Bluetooth and AirPrint printers for receipt printing
- Supports English, Spanish and French prompting for your customer

## Supported Mobile Devices:

- Apple iPhone™, iPad™ & iPad Mini™, iPod Touch™ with iOS 5.1 or later
- All mobile devices operating on Google Android version 2.3.3 or higher
